- **Service Overview:** Detailed information about the range of services offered, tailored for residential and commercial needs.
- **Contact Form:** An integrated form for users to get in touch or book a consultation effortlessly.
- **Responsive Design:** Optimized for mobile, tablet, and desktop views, ensuring a seamless user experience.
- **Call-to-Action Sections:** Strategically placed buttons for inquiries.

Technologies & npm Packages Used

- **Frontend:**
 - React.js: For building a dynamic and responsive user interface.
 - Tailwind CSS: For creating a modern, clean, and responsive design.
 - Styled Components: For custom styling and reusable components.
 - Framer Motion: For implementing smooth animations and transitions.
- **Forms:**
 - Form.io: To handle contact form submissions.
 - React Hook Form: For managing form state and validation.
- **Other Utilities:**
 - React Icons: To include high-quality icons across the interface.
 - Axios: For handling API calls if data fetching is required.
 - Animate.css: To add additional prebuilt animations for elements.
