

Matchmaking Platform with Dashboard

A responsive full-stack matchmaking platform for users in Bangladesh, featuring secure authentication, role-based dashboards, and protected routes. Users can create and manage biodata, send match requests, and interact with profiles, while admins monitor analytics and premium memberships. The platform also integrates Stripe, requiring secure payment to access detailed biodata when users show interest in a profile.

Key Features

- **Responsive Design:** Optimized for mobile, tablet, and desktop devices.
- **Role-Based Dashboards:** Separate user and admin dashboards with protected routes.
- **Profile Management:** Users can create, update, and manage biodata and match requests.
- **Stripe Payment Integration:** Users must complete a secure payment via Stripe to unlock detailed biodata information when they express interest in a profile, enabling a premium matchmaking experience.
- **Admin Analytics:** Dashboard includes insights on biodatas, gender distribution, premium users, and revenue.
- **Success Stories:** Users can share success stories with images and reviews.
- **Live Statistics:** Displays real-time platform statistics.
- **Secure Authentication:** Firebase Authentication for secure login and registration.
- **CRUD Operations:** Create, read, update, and delete operations with user-friendly notifications.
- **Premium Membership System:** Access to exclusive features through subscription.
