Professional Summary

Web Developer with experience building responsive, dynamic web applications using JavaScript, TypeScript and React.js. Recently relocated to Germany and actively seeking opportunities to contribute to innovative web projects. Skilled in collaborating with backend teams to deliver end-to-end solutions, including AI-powered features such as chat assistants and intelligent automation using OpenAI APIs. Strong problem-solving, communication, and analytical skills, with a passion for leveraging modern technologies to enhance user experience.

Skills

Frontend: JavaScript (ES6+), TypeScript, React.js, Tailwind CSS, HTML5, CSS3

Backend: Node.js, Express.js, MongoDB, RESTful API design

AI Integration: OpenAI GPT models, AI chat assistant integration, prompt engineering, API optimization

Dev Tools: Git, GitHub, Postman, VS Code, Figma

Deployment & Cloud: Vercel, Netlify, Firebase, Basic CI/CD concepts

Soft Skills: Collaborative communication, critical thinking, analytical problem-solving, agile teamwork

Experience

August 2024 – Present

Transition period with other roles

- Relocated in Germany after completing MSc in Management Information Systems in Norway.
- Continued building personal web projects, completed a course focusing on full-stack development.
- Worked in hospitality to support relocation transition and gain cross-cultural work experience while pursuing web development opportunities.

October 2021 – June 2022

Web Developer, Crebsol Ltd, Dhaka

- Translated design concepts into functional code using **HTML, CSS, JavaScript, and React.js**, delivering responsive web applications that enhanced user engagement.
- Collaborated with backend teams to integrate Node.js with MongoDB, streamlining communication between systems and reducing errors.
- Completed a critical project 20% ahead of schedule, enabling the team to meet tight deadlines and exceed client expectations.

August 2014 – September 2021

Information Technology Teacher, Srijonshil Model School, Dhaka

- Deliver engaging IT lessons, fostering a technology-friendly learning environment for students.
- Making students familiar with basic computer components. Providing basic knowledge of different operating systems, useful applications and Networking fundamental.
- Consistently improved student performance, with over 80% of students demonstrating measurable progress in IT related assessments and hands-on tasks.

April 2012-July 2014

Junior HTML Developer, Design Source Team Ltd, Chattagram

- Converted designs from figma into functional code, building and styling web pages using HTML, CSS and JavaScript.
- Collaborated with designers, developers, and team members to deliver high-quality user interfaces.
- Developed the company's official website, which enhanced their online presence and contributed to a significant increase in revenue by attracting more clients and generating leads.

Education

August 2022 - July 2024	University of South-Eastern, Norway, Oslo Master of Science, Management Information System
August 2006 - May 2011	Southern University Bangladesh Bachelor of Science, Electronics and Communication Engineering

Projects

1. Marathon Management System with AI Assistant

- A comprehensive platform integrated an AI-powered assistant using OpenAI GPT models to provide real-time event information, user guidance, and registration support through a conversational chat interface.
 - **Technology:** Tailwind CSS, React.js, Node.js, Express.js, MongoDB, OpenAI API, Stripes, Vercel, Netlify.
- [Live site](#), [Github Client](#), [Github Server](#).

2. BD Matrimony (MERN Stack Website)

- A responsive matrimony platform with secure authentication, user/admin dashboards and premium membership features. Integrated Firebase Auth, dynamic CRUD with notifications, and analytics (gender stats, revenue, success stories).
 - **Technology:** Tailwind CSS, React.js, Node.js, MongoDB, Firebase authentication.
- [Live site](#), [Github Client](#), [Github Server](#).

3. Crowdfunding Application

- A crowdfunding platform where individuals and organizations can raise money for different causes, ideas, or projects.
 - **Technology:** TypeScript, React.js, Node.js, MongoDB, Firebase authentication.
- [Live site](#), [Github Client](#), [Github Server](#).
